Summary

Currently pursuing in the BTech program in Computer Science and Engineering at Amrita Vishwa Vidyapeetham, with practical experience in both collaborative and leadership positions. Enthusiastic about tackling real-world challenges through innovative solutions. Dedicated to growing as a problem solver while contributing meaningfully to team success. Eager to apply my knowledge in impactful projects.

Education

Amrita school of engineering, Amritapuri

Aug 2023 - Present

Bachelor of Technology — Computer Science Engineering

- CGPA: 7.16/10

Tirumala Junior college, Visakhapatnam

Aug 2021 - May 2023

Intermediate

- Percentage: 94%

Projects

Sanjeevani

HTML | CSS | JavaScript | NodeJS | MySQL

- Building Sanjeevani, an AI-powered healthcare web application focused on emergency response, intelligent medical guidance, and decision support.
- Leading React frontend development, coordinating module integration, and contributing to AI feature integration for improved reliability.

Airline Operating System

ReactJS | JavaScript | Java

- Designed a responsive airline booking interface for selecting flights, entering passenger details, and confirming bookings using **HTML, CSS, and JavaScript**.
- Implemented seat allocation and booking history using **arrays** and **search algorithms**.

Train Ticket Booking System

NodeJS | Express | PostgreSQL

- Designed RESTful APIs and a relational database schema to manage train schedules, passengers, bookings, and seat allocation.
- Added booking history, input validation, and responsive design for smooth user.

Publications

HELPR: Helmet Enforcement and License Plate Reconnaissance

-IEEE ICMCSI 2026

- Designed a real-time traffic surveillance system to detect riders, helmet compliance, and number plates using **YOLOv8**.
- Implemented accurate license plate text extraction using **EasyOCR**, ensuring robustness under varying lighting and occlusion.

Workshops Attended

- Participated in AINCAT - 2025
- Completion of AI Tools and ChatGPT workshop
- Completed a practical workshop on AI Upskilling

Technical Skills

Languages: Python, Java, SQL, HTML5, CSS, JavaScript, C,

Developer Tools: PowerBI, Git, Github, Azure, Jira

Libraries/Frameworks: ReactJS, PostgreSQL, NodeJS

Achievements

- Selected for 2nd level in Coding contest.
- Participated in District level in Badminton.
- Selected for 2nd level in NMTC.

Language Proficiency

- **English, Telugu, Hindi** to Read, Write, Speak and Understand.
